More information at toxicity of CDP-choline. A comparison between LD50 by the oral route and by intraperitoneal route]. The acute toxicity of choline-derivative, CDP-choline, was studied in rats by both the oral and intraperitoneal route. A dose of 5.0 mg/kg was found to be lethal by the oral route. This dose also produced typical signs of toxicity in the intraperitoneal route. The LD50 was determined to be 2.5 mg/kg in the intraperitoneal route.[Effects of different exercises on the physical fitness of young adults]. The purpose of this study was to compare the effects of two different physical fitness training interventions on the physical fitness of young adults. Forty-four volunteers between the ages of 18 and 25 were randomly assigned to one of four groups: (A) a group that followed a regular physical fitness program for three weeks, (B) a group that followed a regular physical fitness program for three weeks, (C) a group that followed 82157476af
