A HERO RISES

While this Alternative Ending is in play, the amount of fate in the game is not limited. If all the fate tokens provided by the game are taken, use other tokens or counters to represent additional fate.

Whenever a character defeats an Enemy or character in battle or psychic combat, he gains 1 fate, in addition to any other rewards.

Whenever a character loses a battle or psychic combat, he loses 1 fate, in addition to any other penalties.

If a character would replenish fate, and is already at or above his maximum fate, he gains 1 fate instead.

The first character to reach the Crown of Command with 13 or more fate wins the game!

Resume Game

4) Gain 1 Craft.
5) Gain 1 Strength.
6) Gain 1 Spell.

Visit the Alchemist - Discard any number of Objects you have and gain 1 gold for each.

Let's start with this, I am an avid RL Disc Golfer.

I've been waiting for the announcement of a VR Disc Golf game since I bought my VIVE. I am happy to report, that this is a very good step in the correct direction. The physics are pretty much right there. There are 4 different "discs" to choose from to help you with your shots. The courses are all "digital" and are pretty challenging. Sound and Music are also on point.

If you actually play Disc Golf, it's going to take a bit of getting used to. Took me about 2 full rounds of 18 before I started to understand how to change my play to fit the game. The disc is about 6" farther out that you normally throw so you have to adjust to that. Once you get that down, I was shooting Par in no time.

I can't wait for them to add "Leagues" and Multiplayer in the near future. This is definately going to be a game for the Disc Golfer and the non-Disc Golfer. Great development team and a very promising future.. Good \u2665\u2665\u2665\u2665ing Meme. Just shows a pink screen

. Super simple (which may simultaneously be its drawback). Super popular with my friends. Still scars the s__t of me.

If you're wondering, it's worth it.. Amazing DLC.

Since it's a little short, it allows for some replayability which is good (since i've played this dlc 3 times over already together with the main game 5-6 times)

+Add's a whole new gun, the "Ion Laser"

+Awesome Story

+Quite tough (disable vita chambers, and put it on hard)

+New Plasmid "Gravity Well" ton of fun to use

-This DLC did cause sound issues with the main game.

(10/10) - Amazing. A great time killer, had a blast playing it. A throwback to some older games from the same genre. I hope you'll add new levels in the near future.. The game is enjoyable, but the leveling system force you to do side quests which are too repetitive and boring. The ending is a bit rushed. Micro-transactions locked you out from most of the game contents. It's not worth it.

An absolute blast in local multiplayer!. Where are the uniforms shown at banner... Is this a scam ?. Enjoyable little game. Some of the instructions are a bit funny. To enable xbox controller support, Press Ctrl + Y and move all the checkmarks to joypad. To fullscreen press 3. To make the game not an autorunner, change the controls to dpad. The controls feel a little bit floaty, but overall I enjoy the game and the writing. Characters are snarky and you get achievements for lots of random things. Such as inspecting poo. lol

All and all, not the next Mario but a fun way to waste a couple of hours when you are bored. OST is bright and cheery.. This should not be paid DLC. Great route so far, nice bit of London, complements the South London Line. Had the issue with the 378 not showing up, easily fixed by running a Steam verification of the game files. Also, it helped to close and restart Steam, the missing 378 then showed up. So recommend the route and the 59.. It is cancer xd. it gets very fun when the stages get harder especially if you like retro games. all this is, is BULL waves after waves and then timed sections and it isn't even over an hour of play would you play 5 canadian for this bs because it was a grave mistake on my part and i feel like a absolute idiot for it. It's a cute game, not really meant for an avid video gamer, and certainly not upto par with modern graphics however - Compared to the Enchanted Princess which I've also played, it felt somewhat better than that. Atleast this time you don't have a health bar that goes to 0, does nothing, then just fills again, like the EP PS2 Version. Don't get me wrong - I haven't found a way to lose yet, but that might be a good thing considering the target audience is much younger than me.

For the target audience the game possesses some unique features, particularly with the entire Disney Princess Series under copyright, you basically can't find these characters in other games afaik. For young girls, and prehaps some boys too, this is a game that is designed to keep them entertained not teach them world class chess strategy. I do feel rather bad that these games get a rather "girly" stigma. Nothing wrong with a boy enjoying playing dress-up in girl's clothes.. Combines traditional tower defense games with Diablo 2 loot. Lotta loose depth to this game. Can easily scale the game difficulty however you wish by taking different rune challenges and items, along with different traps. If you love seeing how far you can go and also making defenses to kill hordes, then yep, this game's up your alley.

At the time of this review: There's still a couple of prety important bugs that need to be fixed, so keep that in mind.
